3. Foie gras is an expensive appetizer produced by force feeding ducks or geese an amount of feed weighing up to 20 percent of their normal body weight per day over two to three weeks, so that their livers swell up to 10 times their normal size. A long metal pipe is inserted down the birds' throats two to three times per day, and the birds are slaughtered just before the point they would die from the force feeding. At least 15 countries around the world have outlawed this force feeding. Starting in 2012, a California state law will go into effect making the sale or production of foie gras from force-fed birds illegal. Do you ... that force feeding ducks or geese to produce foie gras should be illegal?
